Education

Ajay Kumar Garg Engineering College
Computer Science Engineering

Experience

September 2018 -- Present

Software Developer • Full stack Developer • Primus Software Corporation

Working on two projects end-to-end development, responsible for front-end, backend and DevOps.

Professional Projects

Schema-Builder

Jan 2019 – Present

- Project based on MERN stack
- Creates schemas for orders for various other apps to consume.
- Reduced legacy schema generation time by 80%.
- Improved application security by creating a scope and roles specific API accessibility.
- Containerized the App and migrated to AWS EKS from Heroku and deployed on Kubernetes and created pods and clusters to improve App availability by 70%.

Client 2.0

April 2019 – Present

- Rewrite of Client 1 from Angular to React.
- Redesigned old workflow to prevent needless creation of orders and hence prevent database getting crammed with unnecessary documents.
- Designed Highly Responsive User Interface to provide users a seamless experience across various devices.
- Improved application security by implementing Auth0's authorization code flow.

Personal Projects

Covid-19 Dashboard

- A Covid-19 tracker made in React JS.
- Shows a simple world map that shows a visual represent of Covid-19 deaths of countries, with a basic tooltip showing brief details.
- Represents the data in a sortable tabular format.
